

KAUFFMAN'S

Amino-E™

Proteins are the building blocks of life that are vital for virtually every process going on in your horse's body, including new tissue formation.

Able to produce some amino acids, horses are unable to synthesize the essential amino acids that are crucial for building bone, blood, muscle health and other body functions.

Amino-E™ is formulated to provide the necessary supplementation of the 3 most limiting essential amino acids to help drive muscle health and optimal performance in today's equine athletes.

Amino-E is a high-quality source of Vitamin E, Lysine, Methionine, and Threonine

There are 22 different amino acids needed for protein synthesis, the process of breaking down proteins and creating new amino acids and protein. Horses can produce some amino acids naturally and from feedstuffs.

However, there are 10 amino acids that can only be supplied through dietary sources and supplementation. Of those, the 3 most limiting in the diet are lysine, methionine and threonine.

Without those limiting amino acids, proteins may not be available for use which can lead to arrested growth and development in young horses, nitrogen imbalance, reduced selenium bioavailability, poor body condition and structural breakdown in hard working horses.

KAUFFMAN'S® Amino-E contains substantial levels of lysine, methionine and threonine to provide the supplemental levels needed to meet your horse's needs.

- Lysine is important for bone growth and building muscle in performance horses
- Methionine reduces the severity of muscle breakdown and aids in muscle building
- Threonine is key for strength and elasticity connective tissues, which promotes joint flexibility
- Methionine encourages healthy skin, coat health and strong hooves

Add Amino-E to your equine's daily supplement routine to ensure they are receiving essential amino acids to promote muscle health and drive optimal performance.

SOLUTIONS FOR HEALTH & PERFORMANCE

Amino-E™

| Guaranteed Minimum Analysis | per lb. | per oz |
|-----------------------------|-----------|----------|
| Vitamin E, min. | 80,000 IU | 5,000 IU |
| Lysine, min. | 10.60% | 3,000 mg |
| Methionine, min. | 2.86% | 810 mg |
| Threonine, min. | 6.46% | 1,830 mg |

Ingredients: Vitamin E supplement, Yeast Culture, Calcium Carbonate, L-Lysine, L-Threonine, Fenugreek Seed, dl-Methionine, and Sodium Aluminosilicate.

Suggested Use Directions: Top dress one level scoop on daily feed. Enclosed scoop holds approximately one ounce when level full.

Amino-E is available in two sizes:

- 4 lb bag (64 day supply for 1 horse)
- 12 lb bag (64 day supply for 3 horses)

Recommended Use Areas:

- Lesson horses
- Performance horses
- Work horses
- Young horses
- Muscle deficiencies
- Anywhere amino acid supplementation is needed

Available From:

Amino-E is part of Kauffman's complete line of nutritional supplements containing optimal levels of balanced quality ingredients to support equine health and performance.
