

KAUFFMAN'S

Flex Steps™ Powder

Painful joints, poorly conformed horses, degenerative joint disorders and injuries can set your equine back and keep them from doing their job comfortably.

Flex Steps™ delivers the fundamental ingredients needed for supporting joint health and mobility to help keep tissues soft and supple so your equine can perform and do their job to the best of their ability, every day.

KAUFFMAN'S® Flex Steps delivers a proprietary blend of key building blocks to promote healthy joint function. Available in powder and pellet form.

KAUFFMAN'S Flex Steps formula is specifically built with proven joint support nutraceuticals to promote optimal joint health to provide flexibility, support and mobility in a variety of equine athletes so they exceed at their everyday tasks.

This unique blend has been formulated to deliver not only the right amounts but also in the proper ratios of glucosamine, chondroitin, hyaluronic acid (HA) and MSM (methylsulfonyl methane) to help keep joints lubricated and functioning properly.

- Hyaluronic acid is key for proper synovial fluid function and articular cartilage support. It nurtures the joint and promotes shock absorbing capabilities
- MSM contains a readily available form of sulfur. Sulfur is critical for the production of collagen contained in connective tissue and joint cartilage
- Research has shown that chondroitin and glucosamine help to stimulate cartilage growth and provide support during joint fluid inflammation to minimize wear and tear on joints
- Proprietary blend of ground flaxseed, fenugreek (Omega-3-F) and fish oil provides a significant source of essential Omega-3 fatty acids DHA and EPA to provide support in the presence of post-exercise inflammation
- Flex Steps is palatable and delivers exceptional value in promoting joint health

Use Flex Steps in your equine's diet to help with joint stress, recovery, flexibility and overall joint health so they can be at the top of their game, every day.

SOLUTIONS FOR HEALTH & PERFORMANCE

Flex Steps™ Powder

Convenient, flexible directions allows you to specifically tailor use of Flex Steps to the activity level and joint stress of your horse!
