

KA-HI Horse Supplement

Are you looking for a supplement or ration balancer to meet your horse's dietary needs every day?

Nutrient-dense KA-HI Horse Supplement is a cold-pressed pellet containing protein, vitamins, minerals and other nutrients formulated for balancing rations or fed by itself for horses on hay or pasture to provide a well-rounded diet.

Horses require different amounts of minerals and vitamins based off their age, weight, and level of activity. Depending on your forage quality, your horse may be deficient in vitamins and minerals.

KA-HI Horse Supplement is a comprehensive pelleted supplement loaded with protein, vitamins and minerals for daily nutritional support in all types of equines. An excellent choice for ration-balancing, horses on hay or grass alone, easy keepers, and for low activity.

- Contains proteinated minerals, Zinc, Copper, Manganese, Iron and Cobalt. Proteinated minerals are more readily absorbed than inorganic minerals.
- Extensive vitamin package includes Vitamin A, D, E, C and B Complex to provide daily supplemental support to meet their dietary needs.
- Ideal for supplemented current diets or as standalone feed for those easy keepers.

Directions for Use:

- Horses in Training, Yearlings, and Stallions = 1 lb. per horse, per day
- Mares = ½ lb. per horse, per day. Increase to 1 lb. three months before foaling. Continue until foal is weaned.
- Weanlings and Working Pleasure Horses = ½ lb. per horse, per day
- Foals and Ponies = ¼ lb. per horse, per day

Add KA-HI Horse Supplement to your horse's diet to help supply the protein, vitamins and minerals they need to thrive everyday.
