

# KAUFFMAN'S

## Omega-3F™

**Normal grain/hay diets are high in Omega-6 fatty acids but extremely low in Omega-3's, creating an imbalance in the ratio necessary to support key body functions.**

**The resulting imbalance can have negative impacts on cardiovascular function, breeding efficiency, inflammatory response, cell growth and stamina.**

**Omega-3F™ is specially formulated with a combination of flaxseed, fish oil and fenugreek to deliver needed Omega-3 fatty acids and promote the proper Omega-3 to Omega-6 ratio.**

Omega-3F delivers essential quantities of high quality Omega-3 fatty acids for equines needing added supplementation due to deficiencies in current feed and forage

Both Omega-6 and Omega-3 fatty acids must be supplied in the horse's diet. Although they may be getting high quality hay and grain, without the ability to graze pasture, Omega-3's will likely be deficient in their diet. This means your horse should receive a high-quality, multi-source Omega-3 supplement to meet their needs.

KAUFFMAN'S® Omega-3F contains substantial levels of flaxseed, fenugreek and fish oil to provide high quality omega-3 fatty acids that help modulate inflammatory responses, promote healthy blood glucose levels and support other key body functions to help equine athletes maintain stamina and performance.

- Fish oil, unlike vegetable oils, contains high levels of Omega-3 fatty acids to promote proper fatty acid ratios and positively impact body tissues. Being energy dense, it can help promote a healthy glycemic response versus grain or vegetable oil mixtures
- Flaxseed provides a high fat (about 42%) energy source of which over 50% are Omega-3's
- Fenugreek is another rich source of Omega-3 fatty acids and is a highly preferred flavor by horses
- It is also a significant source of galactomannans that increase water-binding capacity

Add Omega-3F to your equines diet today to provide high quality Omega-3 profile that helps overcome deficiencies that can hinder horse health and performance.

SOLUTIONS FOR HEALTH & PERFORMANCE

# Omega-3F™

Guaranteed Minimum Analysis		per lb.	per 1 oz
Crude Protein, min.	13.00 %	58.9 g	3.6 g
Fat, min.	36.00 %	163.3 g	10.2 g
Fiber, max.	6.00 %	27.2 g	1.7 g
Total Omega-3	14.37 %	65,200 mg	4,075 mg
Docosahexaenoic Acid (DHA)	1.59 %	7,200 mg	450 mg
Eicosapentaenoic Acid (EPA)	2.12 %	9,600 mg	600 mg

**Ingredients:** Ground Flax Seed, Yeast Culture, Fish Oil, Fenugreek Seed, Calcium Silicate, Natural Mixed Tocopherols.

## **Suggested Use Directions:**

**Foals:** 1 Scoop (28.3 grams) over daily feed.

**Weanlings:** 2 Scoops (56.7 grams) over daily feed.

**Yearlings:** 3 Scoops (85.0 grams) over daily feed.

**Broodmares and Stallions:** 4 to 6 scoops (113.4-170.1 grams) over daily feed. At least 60 days prior to and 30 days after breeding.

**Performance Horses:** 2 to 6 scoops (56.7-170.1 grams) over daily feed at least 30 days prior to and throughout training and competition.

## **Omega-3F is available in three convenient sizes:**

- 4 lb pail (10-64 day supply depending on type of horse being fed)
- 8 lb pail (21-128 day supply depending on type of horse being fed)
- 16 lb pail (42-256 day supply depending on type of horse being fed)

## **Recommended Use Areas:**

- Lack of pasture access
- Omega-3 fatty acid deficiencies
- Equine athletes
